Appl. No. 10/625,812
Amdt. dated May 10, 2006
Reply to Office Action of January 10, 2006

PATENT

Amendments to the Specification:

Please replace paragraph [0059] with the following amended paragraph:

[0059] Applying luminosity mask 330 reduces the brightness of the nearer pixels so that the effect of the off axis projector on the projected image is reduced. Fig. 3E shows the result of applying luminosity mask 330 of Fig. 3D to images 300c and 301c. Image ~~300d~~ 300e on monitor 302 is generally darker at the left hand side due to luminosity mask 330. Image ~~301d~~ 301e on screen 303 is uniformly bright.
